	1 month	3 months	6 months	12 months	Since inception Dec 07 (p.a.)
Aurora Global Income Trust	0.38%	1.40%	9.16%	7.02%	4.09%

Investment objective

The Aurora Global Income Trust (the “Trust”) is a feeder fund which invests into the Aurora Sandringham Global Income Trust (ARSN 131 291 499, the “Master Fund”) which is issued by Equity Trustees Limited. The Master Fund aims to provide investors with steady income returns (as opposed to capital growth) after fees and expenses in excess of the Benchmark over rolling three year periods while protecting their capital. Please note that while we aim to achieve this objective, the returns are not guaranteed.

Investment strategy

The Master Fund seeks to take advantage of global companies that Aurora expects will increase in value relative to the market around the announcement of their quarterly, half-yearly and yearly earnings results while hedging their market and currency exposure.

Investment Manager commentary

The Trust was invested in the Master Fund during December and returned 0.38% for the month. The Trust announced a cash distribution of \$0.03 per Unit for the three months ending 31 December 2010, which represented an annualised yield of 9.95%.

At this time of year the Master Fund has less investment opportunities as the majority of global companies have already reported their September quarter results.

Risk assets rallied strongly during December as investors digested some good economic news and put 2010 behind them. Equities and Commodities rallied strongly with copper up almost 15% for the month while the AUD rallied more than 6% versus the USD. In the US, President Obama extended the Bush era tax cuts and we also saw a big increase in pending home sales. December also saw many brokers release their 2011 forecasts with many upgrading their estimates amid expectations for improvements in employment and company earnings.

Consumer Staples was the Trusts best performing sector due to a good result from the US distiller Brown Forman. It outperformed the market by 6.72% after reporting strong growth particularly from its International Operations. Industrials and Information Technology were the trusts weakest sectors. The worst result came from SAIC Inc which underperformed the market by 7.13% as its outlook disappointed due to budget pressures in its key federal IT end market.

Best/worst performing positions held in December

1. The total 12 month return represents the compounding of each monthly return. All returns are Net of Fees.
2. The Trust intends to always distribute at least 2.5% of NAV per quarter regardless of Trust performance. This means that if the Trust has insufficient net income in a given quarter, investors may receive a partial (or full) return of capital.
3. Each historical distribution has been divided by seven to reflect the Unit split carried out in November 2009.
