

## Aurora Global Income Trust (ASX Code: AIB) Performance Report - October 2011

### Summary

- The Trust returned -1.41% for October compared to the UBS Australia Bank Bill Index which returned 0.42%
- The Trust has returned 4.96% p.a since inception versus the UBS Australia Bank Bill Index which has returned 5.19% over the same period

### Performance<sup>1</sup>

	1 month	3 months	12 months	2 Years (p.a)	Since Inception (p.a)
Investment Strategy - Composite	-1.41%	-1.84%	-2.75%	0.18%	4.96%
UBS Australia Bank Bill Index (Benchmark)	0.42%	1.24%	5.02%	4.74%	5.19%

The above composite/hybrid performance summary reflects a combination of the performance of the investment strategy as it applied (net of fees) within the former Aurora Sandringham Global Income Trust (ARSN 131 291 499 - now terminated) since its inception in July 2008 to August 2011, and then the performance of this Trust (which implemented the same strategy) since 30 November 2010 to date. This is not the actual performance of Aurora Global Income Trust (AIB). The actual return of AIB since inception is 2.38% p.a. The table above and the charts below refer to the performance of the composite/hybrid strategy and not of the actual performance of AIB.

### Investment Objective

To provide investors with steady income returns after fees and expenses in excess of the UBS Australia Bank Bill Index over rolling three year periods while protecting their capital. Please note that while we aim to achieve this objective, the returns are not guaranteed.

### Investment Strategy

To take advantage of global companies that Aurora expects will increase in value relative to the market around the announcement of their quarterly, half-yearly and yearly earnings results while hedging their market and currency exposure.

### Trust Valuations

Fund Size <sup>2</sup>	\$181.7 Million
NAV per Unit	\$1.0710
NAV per Unit plus distributions paid	\$1.5502

### Trust Features

Best month	4.36%
Worst month	-4.51%
Average positive monthly return	1.27%
Average negative monthly return	-0.86%

### Investment Performance -Composite

### Portfolio Commentary

Global equity markets rallied strongly though October after establishing new 1-year lows on the first trading day of the month. The rally included a stretch where the MSCI Index increased for 7 consecutive trading sessions from the beginning-of-month low. Greece was again the focus with the market rallying before and after European leaders announced expanded measures to contain the crisis including an agreement from lenders to accept a 50% face-value haircut on Greek debt. Confidence was also underpinned by a clear improvement in US economic releases.

Earnings announcements on average disappointed the market albeit with significant noise arising from the European situation. The Healthcare and Information Technology sectors were the worst performing while the Materials and Consumer Discretionary sectors were the best performing. The Trusts best performing position was software provider Citrix Systems which outperformed the market by 11.5% after revenue and outlook came in well ahead of expectations. Most of this upside was driven by its cloud-based datacenter solution 'Netscaler'.

The worst performing position was sleep-disorder equipment manufacturer Resmed. It underperformed by 13% after reporting revenue and earnings that missed estimates despite an improvement in Gross Margin. The CEO commented that RMD had 'walked away' from low margin/high volume end of quarter deals as it refused to get involved in a price war.

## Historical Weight by Region - Composite

## Trust Distributions (per Unit)<sup>4</sup>

Period (per Unit)	Amount (\$)	Yield (p.a)
30-Jun-08	\$0.0568	8.18%
31-Dec-08	\$0.0814	12.31%
30-Jun-09	\$0.0814	12.31%
30-Sep-09	\$0.0471	7.70%
31-Dec-09	\$0.0229	7.77%

1. The estimated returns are calculated by compounding each monthly return with distributions reinvested. All returns are net of fees.
  2. Incorporates all unit classes within AIB, and also assets that are external to AIB that are managed by Aurora and utilise the investment strategy or direct variants thereof.
  3. The Trust intends to always distribute at least 2.5% of NAV per Unit per quarter regardless of Trust performance. This means that if the Trust has insufficient net income in a given quarter, investors may receive a partial (or full) return of capital.
  4. Each historical distribution has been divided by seven to reflect the Unit split carried out in November 2009.
- Disclaimer: This information has been prepared by Aurora Funds Management Ltd (ABN 69 092 626 885 AFSL 222110) in its capacity as Responsible Entity for the Aurora Global Income Trust (ARSN 127 692 406). This information is prepared for general information only. It has been prepared without taking into account the objectives, financial situation or needs of any investor, which should be considered before investing. You should not base your decision to invest in the Trust solely on this information. Investors should consider a copy of the Product Disclosure Statement which is available by calling 1300 553 431. You should consider the suitability of the Trust in view of your financial position and investment objectives and needs, and you may want to seek advice before making an investment decision. The information in this Performance Report is of a summary nature only and does not constitute advice of any kind, nor is it an offer of any financial product. Past performance is not a reliable indication of future performance. In particular as the Investment strategy of the Trust was materially altered in November 2010, and performance prior to this date (being from November 2010 to 'since inception') has little bearing on future performance. \*The investment objective is expressed after the deduction of fees and before taxation. See the PDS for details on taxation. The objective is not intended to be a forecast, and is only an indication of what the investment strategy aims to achieve over the medium to long term. While we aim to achieve the objective, the objective and returns are not guaranteed.
