Portfolio Commentary

The local market recovered almost 7% after being down sharply early in the month as a massive earthquake in Japan and continued unrest in the Middle East tested confidence. The S&P/ASX 200 Accumulation Index finished up 0.67% with Materials leading the recovery as the Australian Dollar and commodities rose following G7 currency intervention.

The Japanese nuclear disaster also pushed up the price of natural gas as investors speculated about its potential use as a substitute for nuclear energy. Combined with the Middle-east unrest this made Energy the best performing sector. Woodside was one of the Trust's best performing positions as a gas discovery at its Martin-1 well increased the viability of a second LNG train in the Pluto area in the near future.

Capital Management was a feature of the month with JB Hifi announcing an off-market buyback and Origin Energy announcing a \$2.3b equity raising to strengthen its balance sheet

The Trust finished up 1.93% for the month versus the benchmark return of 0.57%. The Trust's performance since inception of 7.85% per annum continues to outperform both equity market and cash returns of 4.07% and 5.65% per annum respectively.

Notes: Since inception (17 Nov 05) the Trust has delivered an annualised return of 7.37%, assumes distributions and franking credits are reinvested. 1. This represents a cumulative return and assumes the reinvestment of distributions and franking credits. 2.Returns based on Estimated Unit Price. 3. The Benchmark return is calculated daily as 50% of the return of the UBS Australia Bank Bill Index plus 50% of the return of the S&P/ASX 200 Accumulation Index. 4.The Trust intends to always distribute at least 1.5% of NAV, excluding any franking credits, per quarter regardless of Trust performance. This means that if the Trust has insufficient net income in a given quarter, investors may receive a partial (or full) return of capital. 5. Please note each historical distribution has been divided by eight to reflect the Unit split carried out in July 2008. 6. The percentage franked is based on a relative comparison to a Company that may pay a 100% franked dividend. A Unit Trust can accumulate franking credits and pass these through to Unitholders. Trusts can have distributions which include franking at more than 100%.
