

Aurora Global Income Trust (ASX Code: AIB) Performance Report - April 2012

Summary

- The Trust returned 1.1% for April compared to the UBS Australia Bank Bill Index which returned 0.4%
- The Trust has returned 5.5% p.a since inception versus the UBS Australia Bank Bill Index which has returned 4.8% p.a over the same period

Performance¹

	1 month	3 months	12 months	3 Years (p.a)	Since Inception (p.a)
Investment Strategy - Composite	1.1%	1.6%	-1.9%	3.4%	5.5%
UBS Australia Bank Bill Index (Benchmark)	0.4%	1.1%	4.9%	4.5%	4.8%

The above composite/hybrid performance summary reflects a combination of the performance of the investment strategy as it applied (net of fees) within the former Aurora Sandringham Global Income Trust (ARSN 131 291 499 - now terminated) since its inception in July 2008 to 30 November 2010, and then the performance of this Trust (which implemented the same strategy) since 30 November 2010 to date. This is not the actual performance of Aurora Global Income Trust (AIB). The actual return of AIB since inception is 3.1% p.a. The table above and the charts below refer to the performance of the composite/hybrid strategy and not of the actual performance of AIB.

Investment Objective*

To provide investors with steady income returns after fees and expenses in excess of the UBS Australia Bank Bill Index over rolling three year periods while protecting their capital. Please note that while we aim to achieve this objective, the returns are not guaranteed.

Investment Strategy

To take advantage of global companies that Aurora expects will increase in value relative to the market around the announcement of their quarterly, half-yearly and yearly earnings results while hedging their market and currency exposure.

Trust Valuations

Worst month	-4.5%
Average positive monthly return	1.5%
Average negative monthly return	-0.9%

Investment Performance -Composite

Portfolio Commentary

Global Equity markets fell during April as a political backlash against European austerity plans gained momentum. Europe indices fell to 3 month lows as French president Nicolas Sarkozy lost the first round of elections with anti-euro, anti-austerity candidates winning a large share of the vote. This was followed a day later by the resignation of the Dutch PM and his cabinet after the coalition government failed to reach agreement on budget cuts. US indices outperformed after stronger than expected earnings overshadowed lackluster economic releases including disappointing labour market figures.

The strategy's best performing sectors were Industrials, Energy and Utilities while Telecommunications, Healthcare and Materials were the worst performing. The strong performance in the US was supplemented by some good results in Sweden which exhibited signs of mean reversion after it was one of the weakest countries last quarter.

Finnish elevator and escalator company Kone was the

strategy's best performing position as it overcame a challenging pricing environment to significantly beat estimates. It outperformed by 15% with the 1st quarter order intake of €1.37b surpassing consensus estimates by 23%. SanDisk which manufactures solid state storage for mobile devices underperformed by 17% and was the strategy's worst performing position after forecast revenues were worse than expected with a recovery not expected until the second half of 2012 when new products from leading manufacturers start shipping. Margins were also well below estimates with an industry oversupply causing prices to fall.

Trust Distributions (per Unit)⁴

Period (per Unit)	Amount (\$)	Yield (p.a)
30-Jun-08	\$0.0568	8.18%
31-Dec-08	\$0.0814	12.31%
30-Jun-09	\$0.0471	7.69%
30-Sep-09	\$0.0229	7.78%
31-Dec-09	\$0.0250	8.58%
31-Mar-10	\$0.0250	8.22%
30-Jun-10	\$0.0250	8.26%
30-Sep-10	\$0.0250	8.75%

1. The estimated returns are calculated by compounding each monthly return with distributions reinvested. All returns are net of fees.
2. Incorporates all unit classes within AIB, and also assets that are external to AIB that are managed by Aurora and utilise the investment strategy or direct variants thereof.
3. The Trust intends to always distribute at least 2.5% of NAV per Unit per quarter regardless of Trust performance. This means that if the Trust has insufficient net income in a given quarter, investors may receive a partial (or full) return of capital.
4. Each historical distribution has been divided by seven to reflect the Unit split carried out in November 2009.

Disclaimer: This information has been prepared by Aurora Funds Management Ltd (ABN 69 092 626 885 AFSL 222110) in its capacity as Responsible Entity for the Aurora Global Income Trust (ARSN 127 692 406). This information is prepared for general information only. It has been prepared without taking into account the objectives, financial situation or needs of any investor, which should be considered before investing. You should not base your decision to invest in the Trust solely on this information. Investors should consider a copy of the Product Disclosure Statement which is available by calling 1300 553 431. You should consider the suitability of the Trust in view of your financial position and investment objectives and needs, and you may want to seek advice before making an investment decision. The information in this Performance Report is of a summary nature only and does not constitute advice of any kind, nor is it an offer of any financial product. Past performance is not a reliable indication of future performance. In particular as the Investment strategy of the Trust was materially altered in November 2010, and performance prior to this date (being from November 2010 to 'since inception') has little bearing on future performance. *The investment objective is expressed after the deduction of fees and before taxation. See the PDS for details on taxation. The objective is not intended to be a forecast, and is only an indication of what the investment strategy aims to achieve over the medium to long term. While we aim to achieve the objective, the objective and returns are not guaranteed.
