

Aurora Dividend Income Trust Performance Report - July 2014

Summary

- The Trust rose by 3.5% in July while the market rose by 4.4%
- On a risk adjusted basis, the Trust outperformed by 1.2%
- The outperformance of material stocks including BHP and Rio Tinto aided performance

Objective

The objective of the Trust, relative to the Australian equity market, is to provide investors with:

- greater total returns over rolling 5 year periods;
- more income and franking credits each year; and
- less volatility.

The Australian equity market is measured by the S&P/ASX 200 Accumulation Index adjusted to include franking credits.

Performance after Fees

Returns including franking credits	1 month	3 months	12 months	3 yrs (p.a)	Since (p.a.) 31-Dec-10	Since Inception 16-Nov-05 (p.a)
Dividend Income Trust	3.5%	0.8%	9.8%	12.4%	10.2%	8.1%
Benchmark*	2.3%	2.2%	10.2%	9.3%	7.5%	5.8%

Historic Performance Chart

Commentary

July ended with substantial outperformance by Pan Asian equities over western developed markets. The S&P/ASX 200 Accumulation Index climbed 4.4% and Hong Kong's Hang Seng increased by 6.8%. In stark contrast, European and US Equities were down -3.5% and -1.4% respectively (as measured by the Euro Stoxx 50 and S&P 500 indices). The fears which drove the western developed markets underperformance (geopolitical, cheap credit, valuations) have much reason to cause ongoing angst in global markets. We look forward to the rest of the year, expecting these factors to drive wider dispersion in the S&P/ASX 200 Index constituents.

Much of the local markets outperformance can be attributed to a return to favour for the bulk miners with the S&P/ASX Materials Index up 7.7% for the month and suited the Trust's overweight exposure to this market segment and specifically BHP and RIO, reversing their previous months underperformance.

The Trust rose by 3.5% in July, underperforming the broader market but outperforming on a risk adjusted basis. Since inception, the Trust has returned 8.1% p.a. which is in-line with the underlying market, and has achieved this with materially less risk as highlighted in the chart below.

Notes:

1. The returns describe the consolidated returns after fees of the Trust and the Aurora Sandringham Dividend Income Trust (ARSN 108 249 154, 'ASDIT' established 16 November 2005). They assume the reinvestment of distributions and franking credits. The performance references against the S&P/ASX 200 Accumulation Index plus the value of franking credits as determined by Aurora. The investment strategy of these trusts were modified on 31 December 2010.

2. The Trust intends to always distribute at least 0.5% of NAV in cash plus any available franking credits, per month regardless of performance. This means that if there is insufficient net income in a given month, investors may receive a partial (or full) return of capital.
