

Aurora Global Income Trust (ASX.AIB)

Performance ¹	1 month	3 months	FYTD
Aurora Global Income Trust	-1.11%	1.92%	6.89%
Benchmark	0.13%	0.38%	1.15%
Outperformance	-1.24%	1.54%	5.74%

Investment Objective

The Fund seeks to achieve absolute returns and income through the use of several different global investment strategies with the aim of having very little correlation to global equity market indexes. The focus on absolute returns differs from traditional funds in that the Fund aims to produce positive returns regardless of equity market conditions.

Investment Strategy

The Fund seeks to take advantage of market mispricing's and arbitrage opportunities using a diverse range of investment strategies. We research various criteria for each investment, these criteria may pertain to fundamental and quantitative analysis, company event situations such as takeovers and mergers, earnings announcements, demergers and restructuring, liquidity events, recapitalisations, multiple share classes, option availability and pricing. The Fund invests in opportunities that it considers to offer attractive risk return characteristics with a focus on potential catalysts that seeks to generate a profitable return regardless of the market direction. The Fund may use derivatives for risk management as well as to create new positions and may opportunistically short sell securities that it believes to be overpriced or to reduce risk on the overall portfolio.

Fund performance summary

- The Aurora Global Income Trust returned -1.11% for the month against its benchmark return of +0.13%, whilst the broader MSCI World Index returned +0.82%.
- The **Convergence** strategy was a key contributor to performance this month, with price to value arbitrages narrowing on key positions in GINV.SG and 8EC.ASX.
- The **Yield** portfolio performed well, with the Fund realising its positions in NABHA and MBLHB during the month, locking in gains from recent performance.
- The **Long/Short** strategy marginally detracted from performance, with gains on a short position VRX.US and a long position in SFLD.SG offset by mark-to-market losses on RNY.ASX and PNW.ASX.
- The Manager elected not to execute any **M&A** or **Earning Announcement** trades during the month.
- The **Volatility** overlay detracted from performance during the month, as market hedge derivative positions on domestic listed equities decreased in value as markets continued to rise.

About Aurora
