The Fund will invest in a portfolio of companies and opportunities listed on the ASX the Investment Manager expects will pay fully franked dividends while employing a risk management overlay to reduce the net exposure to equity market risk.

The Fund invests in opportunities that it considers to offer attractive risk return characteristics with a focus on potential catalysts that seeks to generate a profitable return regardless of the market direction. The Fund may opportunistically short sell securities that it believes to be overpriced or to reduce risk on the overall portfolio.
