Performance¹

	1 mth	3 mths	6 mths	12 mths	2 yrs (p.a.)	Since inception (p.a.)
Aurora Global Infrastructure Income Trust	0.76%	3.47%	7.29%	13.13%	2.19%	2.40%
UBS Global Infrastructure and Utilities 50/50 Index	0.39%	3.40%	9.05%	30.75%	-8.31%	-11.34%

Investment objective

The Aurora Global Infrastructure Income Trust (the Trust) is an ASX listed investment trust that aims to generate income from an active strategy of selling call options over a portfolio of global listed infrastructure securities.

Investment Strategy

The investment strategy seeks to capture income and growth from investing in some of the world's leading listed infrastructure entities.

The Investment Manager will use detailed fundamental analysis to select securities within the global infrastructure sector that may be anticipated to:

- provide a higher than average dividend yield over the medium term (including the influence of franking credits, special dividends and other financial restructuring); and
- provide the scope for additional income generation by the Trust writing call options on these securities.

The portfolio will generally hold 20 securities at any one time (either directly, or indirectly via an investment in a wholesale trust, and/or equity derivative instruments). The Trust may also use some gearing and at the Investment Manager's discretion, the portfolio may opportunistically:

- sell exchange traded or over the counter call options over each individual stock position in order to generate additional income; and
- purchase exchange traded or over the counter put options in order to provide some capital protection.

Investment Manager

Long Tail Asset Management Pty Ltd (AFSL 341474, "Long Tail") has been appointed as the Investment Manager to the Trust with responsibility to advise on the Trust's global investment selection. Long Tail is an Australian based fund manager. An Executive Director of Long Tail (Mr Nigel Trewartha, B.Ec (Honours), M.Comm) has over ten years experience in investment banking, corporate finance and

the infrastructure sector. Immediately prior to joining Long Tail, Nigel worked for over six years at Macquarie Bank Limited in investment banking, corporate finance, and funds management, nearly one year as the Chief Financial Officer of Envestra Limited, and two years as the Managing Director of Talon Infrastructure Pty Ltd.

30 Jun 09	\$0.0471	7.7%
30 Sep 09	\$0.0229	7.8%
31 Dec 09	\$0.0250	8.5%
Total	\$0.2332	

Investment Manager commentary

The Trust achieved a return of 0.76% for February compared to the UBS Global Infrastructure and Utilities 50/50 Index ("Index") which returned 0.39% over the same period.

The Trust's UK water positions were again the main contributor, while most other positions were neutral. Takeover speculation early in the month about one of the Trust's water utilities, Northumbrian Water Group, pushed the stock up over 10%. The speculation was subsequently denied and it finished the month up 7%. This activity helped drag the Trust's other water utility positions higher.

The Trust continues to focus on companies with relatively secure revenue and profitability, solid balance sheets and valuations that look favourable on an ungeared basis. The run up in equity markets over the past twelve months has made new opportunities more difficult to find and this is reflected in the Trust's cash holding. The price of many stocks seems to reflect an ongoing, durable rebound in economic activity, with little allowance for a meaningful set-back. The Trust is well placed to take advantage of new opportunities when they become available.

At the end of February, the Trust was 71% invested in global infrastructure and utility stocks and 29% in cash and other assets.

At the end of February, call options had been sold over approximately 20% and put options purchased over approximately 30% of the underlying stock positions. In addition, the Trust currently has no debt.

Five Stocks from the Portfolio

	Country	Sub-Sector	Weight

1. This number represents a cumulative return and assumes reinvestment of distributions. 2. The Trust intends to always distribute at least 2.0% of NAV per quarter regardless of Trust performance. This means that if the Trust has insufficient net income in a given quarter, investors may receive a partial (or full) return of capital. 3. Each historical distribution has been divided by seven to reflect the share split carried out in November 2009.
