Performance¹

	1 mth	3 mths	6 mths	12 mths	Since inception (p.a.)
Aurora Global Infrastructure Income Trust	-0.90%	6.68%	6.48%	8.23%	2.12%
UBS Global 50/50 Infrastructure and Utility Index	-2.35%	7.59%	11.90%	19.39%	-11.89%

Investment objective

The Aurora Global Infrastructure Income Trust (the Trust) is an ASX listed investment trust that aims to generate income from an active strategy of selling call options over a portfolio of global listed infrastructure securities.

Investment Strategy

The investment strategy seeks to capture income and growth from investing in some of the world's leading listed infrastructure entities.

The Investment Manager will use detailed fundamental analysis to select securities within the global infrastructure sector that may be anticipated to:

- provide a higher than average dividend yield over the medium term (including the influence of franking credits, special dividends and other financial restructuring); and
- provide the scope for additional income generation by the Trust writing call options on these securities.

The portfolio will generally hold 20 securities at any one time (either directly, or indirectly via an investment in a wholesale trust, and/or equity derivative instruments). The Trust may also use some gearing and at the Investment Manager's discretion, the portfolio may opportunistically:

- sell exchange traded or over the counter call options over each individual stock position in order to generate additional income; and
- purchase exchange traded or over the counter put options in order to provide some capital protection.

Investment Manager

During the period, the Trust's Investment Manager was Talon Infrastructure Pty Ltd ('Talon'). On 1 February 2010, Aurora effected the transfer of the Investment Management Agreement from Talon to Long Tail Asset Management Pty Ltd (AFSL 341474, 'Long Tail').

Mr Nigel Trewartha (B.Ec (Honours), M.Comm) is an executive director of Long Tail. Mr Trewartha has over ten years experience in investment banking, corporate finance and the infrastructure sector. He has over six years experience at Macquarie Bank Limited in investment banking, corporate finance, and funds management, nearly one year as the Chief Financial Officer of Envestra Limited, and two years as Managing Director of Talon.

30 Sep 09	\$0.0229	7.8%
31 Dec 09	\$0.0250	8.5%
Total	\$0.2332	

Investment Manager commentary

The Trust achieved a return of -0.90% for January compared to the UBS Global 50/50 Infrastructure and Utility Index ("Index") which returned -2.35% over the same period.

The Trust's UK water positions continue to make a positive contribution (now approximately 20% of the portfolio), while most other areas of the portfolio were weaker.

The water utilities continued to move higher as the companies announced they would accept the price determination of the regulator for the period to 2015, and perhaps more importantly, allayed the market's fear of large equity raisings. Severn Trent is the Trust's largest exposure to the UK water sector (7.4% of the portfolio).

The Trust's US utility holdings (16% of the portfolio) started to report 2009 earnings towards the end of the month. Results to date have mainly been inline or slightly disappointing compared to expectations. The Manager continues to see opportunity in these positions partly due to the build out of new electricity transmission infrastructure which should generate attractive returns compared to cost of capital.

At the end of January, the Trust was 74% invested in global infrastructure and utility stocks and 26% in cash and other assets.

At the end of January, call options had been sold over approximately 20% and put options purchased over approximately 30% of the underlying stock positions. In addition, the Trust currently has no debt.

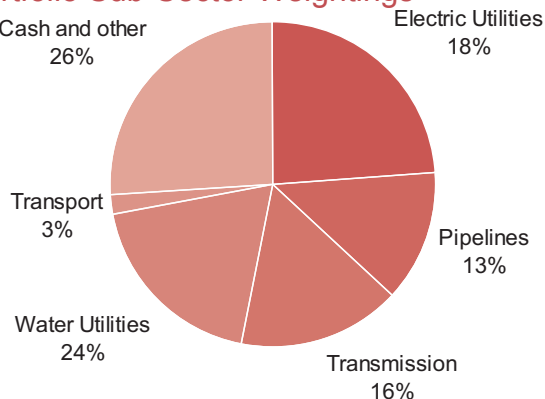

Four Stocks from the Portfolio

	Country	Sub-Sector	Weight
Red Electrica	Spain	Transmission	4.7%
Enagas	Spain	Pipelines	4.6%
Nstar	USA	Electric Utility	4.7%
Pennon	UK	Water Utility	4.8%
Remaining portfolio holdings			81.2%

1. This number represents a cumulative return and assumes reinvestment of distributions. 2. The Trust intends to always distribute at least 2.0% of NAV per quarter regardless of Trust performance. This means that if the Trust has insufficient net income in a given quarter, investors may receive a partial (or full) return of capital. 3. Each historical distribution has been divided by seven to reflect the share split carried out in November 2009.
