Investment Objective & Strategy

The van Eyk Blueprint Alternatives Plus (the "Trust") is a feeder fund which invests into the unlisted van Eyk Blueprint Alternatives Fund (ARSN 112 183 249, the "Master Fund") which is issued by Macquarie Investment Management Limited. The Master Fund aims to provide an actively managed exposure to a range of specialist Underlying Managers who are highly regarded by van Eyk and who employ alternative investment strategies such as fund of hedge funds, global macro, fixed income macro, direct property, commodities and gold. The Trust may use borrowings to increase the investment into the investment strategy.

The Trust aims to generate absolute positive returns while observing the principle of risk diversification whilst providing enhanced investment liquidity and internal gearing to investors.

Investment Manager

van Eyk Research Pty Ltd ABN 99 010 664 632 AFSL 237917 (van Eyk) is the Investment Manager and is responsible for investing the assets of the Trust into the Master Fund and managing the borrowings of the Trust.

van Eyk was established in 1989, and is a leading provider of managed fund research to the Australian financial planning industry, specialising in investment research relating to portfolio construction and management, asset allocation and direct share research. van Eyk is independently owned and receives no payment from fund managers for their ratings.

van Eyk also acts as Investment Manager to a series of managed funds issued by Macquarie Investment Management Limited ("Macquarie"). The van Eyk Blueprint Series consists of a number of multi-manager unit trusts, which includes the Master Fund, that provides investors with access to pre-blended portfolios in either single or multi-asset class options. van Eyk advises on the construction of the portfolios within the van Eyk Blueprint Series and the selection of Underlying Managers. van Eyk provides direction on the proportion of the allocations to each asset class, and to each Underlying Manager, in accordance with their investment research views.

Summary of the Trust

Net Asset Value ¹ (NAV)	\$153.7 million
Net Asset Value ¹ per Unit	\$7.4511
NAV ⁴ Accumulation per Unit	\$10.2207

¹ Estimated.

² Less sell-spread.

³ Rounded to four decimal figures.

⁴ Assumes reinvestment of distributions.

Master Fund Commentary

Reduced exposure to risk assets maintained

Over the September 2010 quarter the Master Fund remained defensively positioned. It has retained a focus on liquid asset classes and underlying managers with a lower level of directional exposure to risk assets. The overall strategic positioning of the Master Fund is consistent with the prior two quarters, including overweight positions in cash, fixed income macro and global macro, and underweight positions in commodities, gold, fund of hedge funds and direct property.

Most hedge fund strategies have now recovered strongly since late 2008, and the composite index has reached its previous October 2007 high watermark. Within alternatives, van Eyk remains supportive of the overweight to diversified and fixed interest macro strategies which have benefited from a decline in market volatility and persistence of trending behaviour. While liquidity and transparency issues continue to weigh on van Eyk's view of the fund of hedge funds sector, increasing levels of corporate activity may begin to provide greater opportunities for security selection within some of the more specific hedge fund sub-sectors such as merger arbitrage and event driven strategies, which may be a positive for the sector.

Spot gold prices climbed 4.9% in September to US\$1308/oz at month end, following a 5.6% rise in August. The precious metal has performed strongly throughout the quarter. With concerns over the US growth outlook combined with the prospect of Federal Reserve balance sheet expansion weighing heavily on longer term Treasury yields and the US dollar, investors have sought gold as an alternative safe-haven investment. Commodities also performed well in the September quarter with severe weather conditions supporting agricultural commodities, particularly sugar and cotton. Industrial metals benefited from an improving global economic outlook that developed during September. While the fundamentals for commodities remain broadly supportive, the risks associated with the global macro outlook continue to warrant caution and van Eyk remains underweight commodities.

van Eyk remains underweight direct property despite ongoing stabilisation and a modest recovery in the September quarter and year to date. Fundamentals of the sector are improving however van Eyk retains a cautious outlook given the sector is highly dependent on the economic growth outlook and the availability of credit.

The Master Fund is designed to provide returns that are not highly correlated with traditional share and bond market returns. van Eyk is responsible for active asset allocation. Any biases within the Master Fund reflect van Eyk's investment outlook and relative market valuations, as published in its subscription-based research for financial planners.

The resulting targeted portfolio is set out in the table below.

van Eyk Blueprint Alternatives Fund at 30/09/2010

Underlying Fund	Target	Strategy
Fauchier Partners Absolute Return Trust	2.0%	Fund of Hedge Funds
