On 1 March 2011, Aurora Absolute Return Fund 'the Fund' changed its investment strategy and commenced investing via the unlisted Aurora Fortitude Absolute Return Fund (ARSN 145 894 800, the 'Master Fund').

Investment Objective

The Fund seeks to achieve absolute returns and income through the use of several different investment strategies with the aim of having very little correlation to equity market indexes. The focus on absolute returns differs from traditional funds in that the Fund aims to produce positive returns regardless of equity market conditions.

Investment Strategy

The Master Fund seeks to take advantage of market mispricing's and arbitrage opportunities using a diverse range of investment strategies. We research various criteria for each investment; these criteria may pertain to fundamental and quantitative analysis, company event situations such as takeovers and mergers, earnings announcements, demergers and restructuring, liquidity events, recapitalisations, multiple share classes, option availability and pricing.

The Master Fund invests in opportunities that it considers to offer attractive risk return characteristics with a focus on potential catalysts that seeks to generate a profitable return regardless of the market direction. The Fund may use derivatives for risk management as well as to create new positions and may opportunistically short sell securities that it believes to be overpriced or to reduce risk on the overall portfolio.
