

Aurora Global Income Trust (ASX Code: AIB) Performance Report - October 2014

Summary

- The Trust returned -0.2% in October 2014, underperforming the UBS Bank Bill Index.
- The Trust benefitted from the expansion of the strategies available to invest in.
- The Earnings Announcement strategy was a drawdown especially for stocks in the Oil & Gold sectors.

Performance¹

	1 month	3 months	1 Year	3 Years (p.a)	Since Inception (p.a) 1 July 2008
Investment Strategy - Composite	-0.2%	1.3%	1.7%	3.1%	4.1%
UBS Australia Bank Bill Index (Benchmark)	0.2%	0.7%	2.7%	3.3%	4.1%

The above composite/hybrid performance summary reflects a combination of the performance of the investment strategy as it applied (net of fees) within the former Aurora Sandringham Global Income Trust (ARSN 131 291 499 - now terminated) since its inception in July 2008 to 30 November 2010, and then the performance of this Trust (which implemented the same strategy) since 30 November 2010 to date. This is not the actual performance of Aurora Global Income Trust (AIB). The actual return of AIB since inception is 2.69% p.a. The table above and the charts below refer to the performance of the composite/hybrid strategy and not of the actual performance of AIB.

Investment Objective*

The Trust aims to achieve absolute returns (i.e. positive returns in both rising and falling equity markets) by using a number of different global investment strategies that allows the performance of the Trust to have very little correlation to the performance of global equity market indexes. The focus on 'absolute returns' differs from traditional funds in that the Trust aims to produce positive returns regardless of equity market conditions.

Investment Strategy

The Investment Manager has a wide discretion over the investments that may be held by the Trust. The pursuit of a diverse range of global investment strategies means that the Trust's returns are not necessarily dependent on any stock markets' direction, or dependent on any specific assumption or key market parameter. The Trust does not seek to replicate the standard industry benchmarks.

The Trust seeks to take advantage of companies that are expected to increase in value relative to the market around the announcement of their quarterly, half-yearly and yearly earnings results, while hedging their market and currency exposure.

In selecting additional investments for the Trust, the Manager follows a rigorous investment selection process which includes detailed qualitative and fundamental research.

The Trust may use derivatives for risk management as well as to create new positions. The Trust may opportunistically short sell securities that are considered to be overpriced in the anticipation of purchasing them later at lower prices for a profit and/or to reduce risk on the overall portfolio.

Average positive monthly return	1.2%
Average negative monthly return	-1.0%

Investment Performance - Composite

Portfolio Commentary

Global equity markets were up 0.6% in October (as represented by the MSCI World Index). Asian Indices were the standout performer globally with European Indices generally lower. The Oil price was down significantly over the month (-10.8%) which clearly impacted Energy companies which reported. The Earnings Announcement strategy produced losses primarily in the Oil & Gold sectors where the market applied discounts to future earnings despite EPS growth in these companies and this resulted in losses. The investment team continues to implement the strategy enhancements recently announced in July, whilst maintaining the earnings announcement risk premium strategy. The strategy has been refined to reduce the number of trades executed whilst increasing the expected return per trade. The Convergence, Long/Short and Mergers and Acquisitions strategies contributed positively to performance, despite this the losses from the earnings announcement strategy resulted in the Trust returning -0.24% for the month.

Earnings seasons continues in earnest with several quarterly reports due in November. Whilst continuing to implement the Earnings Announcement strategy the investment team will use its existing skills set to enhance returns through other strategies.

Trust Distributions (per Unit)³

Period (per Unit)	Amount (\$)	Yield (p.a)
CY-08	\$0.1382	10.0%
CY-09	\$0.0950	7.8%

- Aurora Property Buy-Write Income Trust (ASX Code: AUP)

Aurora Funds Limited

Level 4, 1 Alfred Street, Sydney NSW 2000 PO Box R1695, Royal Exchange NSW 1225

Telephone: 1300 553 431, Visit: www.aurorafunds.com.au, or Email: enquiries@aurorafunds.com.au

1. The returns are calculated by compounding each monthly return with distributions reinvested. All returns are net of fees.

2. The Trust intends to always distribute at least 2.5% of NAV per Unit per quarter regardless of Trust performance. This means that if the Trust has insufficient net income in a given quarter, investors may receive a partial (or full) return of capital.

3. Each historical distribution has been divided by seven to reflect the Unit split carried out in November 2009.

Disclaimer: This information has been prepared by Aurora Funds Management Ltd (ABN 69 092 626 885, AFSL 222110) in its capacity as Responsible Entity for the Aurora Global Income Trust (ARSN 127 692 406). This information is prepared for general information only. It has been prepared without taking into account the objectives, financial situation or needs of any investor, which should be considered before investing. You should not base your decision to invest in the Trust solely on this information. Investors should consider a copy of the Product Disclosure Statement which is available by calling 1300 553 431. You should consider the suitability of the Trust in view of your financial position and investment objectives and needs, and you may want to seek advice before making an investment decision. The information in this Performance Report is of a summary nature only and does not constitute advice of any kind, nor is it an offer of any financial product. Past performance is not a reliable indication of future performance. In particular as the Investment strategy of the Trust was materially altered in November 2010, and performance prior to this date (being from November 2010 to 'since inception') has little bearing on future performance. *The investment objective is expressed after the deduction of fees and before taxation. See the PDS for details on taxation. The objective is not intended to be a forecast, and is only an indication of what the investment strategy aims to achieve over the medium to long term. While we aim to achieve the objective, the objective and returns are not guaranteed.
