

Aurora Global Income Trust (ASX Code: AIB) Performance Report - September 2016

Performance¹

	1 month	3 months	1 Year	3 Years (p.a)	Since Inception (p.a) 1 July 2008
Investment Strategy - Composite	0.97%	-6.25%	-2.59%	1.18%	3.76%
Cash Rate (Benchmark)	0.12%	0.40%	1.87%	2.22%	3.43%

The above composite/hybrid performance summary reflects a combination of the performance of the investment strategy as it applied (net of fees) within the former Aurora Sandringham Global Income Trust (ARSN 131 291 499 - now terminated) since its inception in July 2008 to 30 November 2010, and then the performance of this Trust (which implemented the same strategy) since 30 November 2010 to date. This is not the actual performance of Aurora Global Income Trust (AIB). The actual return of AIB since inception is 2.70% p.a. The table above and the charts below refer to the performance of the composite/hybrid strategy and not of the actual performance of AIB.

Investment Objective*

The Trust aims to achieve absolute returns (i.e. positive returns in both rising and falling equity markets) by using a number of different global investment strategies that allows the performance of the Trust to have very little correlation to the performance of global equity market indices. The focus on 'absolute returns' differs from traditional funds in that the Trust aims to produce positive returns regardless of equity market

Investment Strategy

The Investment Manager has a wide discretion over the investments that may be held by the Trust. The pursuit of a diverse range of global investment strategies means that the Trust's returns are not necessarily dependent on any stock markets' direction, or dependent on any specific assumption or key market parameter. The Trust does not seek to replicate the standard industry benchmarks.

The Trust seeks to take advantage of companies that are expected to increase in value relative to the market around the announcement of their quarterly, half-yearly and yearly earnings results, while hedging their market and currency exposure.

In selecting additional investments for the Trust, the Manager follows a rigorous investment selection process which includes detailed qualitative and fundamental research.

The Trust may use derivatives for risk management as well as to create new positions. The Trust may opportunistically short sell securities that are considered to be overpriced in the anticipation of purchasing them later at lower prices for a profit and/or to reduce risk on the overall portfolio.

Trust Valuations

NAV per Unit	\$0.7673
NAV per Unit plus distributions paid	\$1.6404

Performance Statistics - Composite

Performance since Inception p.a. (July 08)	3.8%
Volatility % p.a.	5.6%
Sharpe Ratio	0.06
% positive months	64.6%
Best month	4.4%
Worst month	-7.4%
Average positive monthly return	1.1%
Average negative monthly return	-1.1%

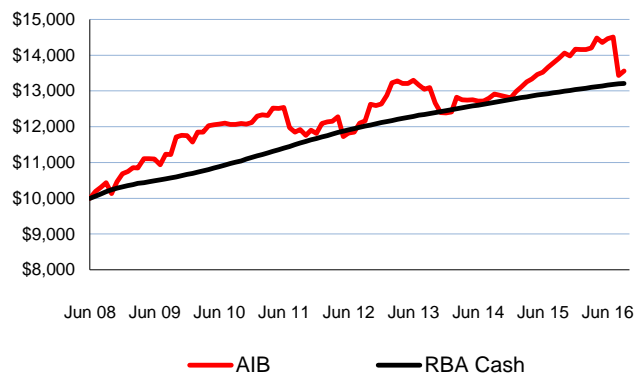

Portfolio Commentary

Global equity market movements were mixed during September (in local currency) with the US S&P500 finishing -0.1%, UK FTSE +1.7%, German DAX -0.8% and the Japanese Nikkei -2.6%, whilst the Australian market (S&P/ASX200) was flat +0.1%.

The Aurora Global Income Trust was up 0.97% in September. Performance was largely driven by the Convergence strategy and Long positions within the Long/Short strategy. The Convergence profitability was driven by the narrowing of discount on an international holding company trade. Long Short was largely driven by holdings in domestic companies trading at discounts to cash and marketable securities, including ACQ +6.9%, MEL +3.2% and MPO +8.3%.

Other strategies produced modest returns. The Trust continues to seek opportunities in all strategies, with a current emphasis on companies trading at a discount to cash and/or liquid assets within the Trust's Long/Short and Convergence strategies. Under the yield strategy we continue to seek risk mispricing using a bottom up approach.

Investment Performance - Composite

Trust Distributions (per Unit)³

Period (per Unit)	Amount (\$)	Yield (p.a)
CY-08	\$0.1382	10.0%
CY-09	\$0.0950	7.8%

1. The returns are calculated by compounding each monthly return with distributions reinvested. All returns are net of fees.
 2. The Trust intends to always distribute at least 2% of NAV per Unit per quarter regardless of Trust performance. This means that if the Trust has insufficient net income in a given quarter, investors may receive a partial (or full) return of capital.
 3. Each historical distribution has been divided by seven to reflect the Unit split carried out in November 2009.
- Disclaimer: This information has been prepared by Aurora Funds Management Ltd (ABN 69 092 626 885, AFSL 222110) in its capacity as Responsible Entity for the Aurora Global Income Trust (ARSN 127 692 406). This information is prepared for general information only. It has been prepared without taking into account the objectives, financial situation or needs of any investor, which should be considered before investing. You should not base your decision to invest in the Trust solely on this information. Investors should consider a copy of the Product Disclosure Statement which is available by calling 1300 553 431. You should consider the suitability of the Trust in view of your financial position and investment objectives and needs, and you may want to seek advice before making an investment decision. The information in this Performance Report is of a summary nature only and does not constitute advice of any kind, nor is it an offer of any financial product. Past performance is not a reliable indication of future performance. In particular as the Investment strategy of the Trust was materially altered in November 2010, and performance prior to this date (being from November 2010 to 'since inception') has little bearing on future performance. *The investment objective is expressed after the deduction of fees and before taxation. See the PDS for details on taxation. The objective is not intended to be a forecast, and is only an indication of what the investment strategy aims to achieve over the medium to long term. While we aim to achieve the objective, the objective and returns are not guaranteed.
